SHANKAR B PUTHANI

Software Engineer | React | TypeScript | Python | Full-Stack Development
8904964346 • shankar.beruflich@outlook.com • LinkedIn • Portfolio • Bengaluru

Summary

Frontend-focused Software Engineer with 2.7 years of experience delivering production-grade React and TypeScript applications in the aviation and aerospace industry. Proven ability to own end-to-end feature development — from UI workflows and REST API integration to RBAC implementation — within cross-functional Agile teams on enterprise-scale platforms. Currently open to Software Engineer and Frontend Developer roles at product-based companies in Europe and India.

Key Achievements

Streamlined Inspections
Increased workflow efficiency by 30% using React Konva for image defect markup.

Automated Data Extraction
Reduced manual report generation by 80% through automated Excel generation.

Optimized Defect Handling
Enhanced defect management, boosting resolution time by 40% with RBAC features.

Improved Data Accuracy
Implemented OCR tool reducing data errors by 50% in engineering workflows.

Experience

Accenture
Bengaluru, India

Engineering Services Analyst
01/2024 - Present

- Developed and maintained full-stack features for a production aircraft inspection platform using React.js, TypeScript, and Python Flask
- Built reusable, responsive React components implementing defect creation, status tracking, and management workflows for mobile and desktop users
- Integrated frontend interfaces with backend REST APIs across inspection, defect tracking, image annotation, and reporting modules
- Implemented Role-Based Access Control (RBAC) and permission-driven navigation to manage multirole access across the platform
- Developed Python automation tools for engineering data validation and built an OCR-based desktop application using OpenCV and EasyOCR to automate extraction of structured engineering data from images
- Collaborated in an Agile team across frontend, backend, and QA to deliver iterative releases on a large-scale enterprise platform

Skills

Frontend: React.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · Responsive Web Design · SVG · React Konva

Backend: Python · Flask · REST API Integration · Role-Based Access Control (RBAC)

Automation: OpenCV · EasyOCR · OpenPyXL · Pillow · BeautifulSoup · Excel Automation · Data Processing

Tools: Git · Tkinter · html2canvas · Draw.io XML · Regex

Projects

Ultimo-DevX
Bengaluru, India
10/2025 - 09/2026

Aircraft Inspection & Defect Management Platform

- Developed inspection and defect management workflows on a full-stack platform; built image capture and annotation features using React Konva enabling engineers to mark defects directly on images.
- Implemented RBAC-based navigation, attachment upload, and defect status tracking to support end-to-end digital inspection workflows across responsive mobile and desktop layouts.

NOVO Screenshot Automation Tool
Bengaluru, India
11/2025 - 12/2025

OCR-Based Engineering Data Extraction

- Built a desktop application to automate extraction of Part Numbers, Drawing Set numbers, and ATA codes from engineering screenshots using OpenCV preprocessing and EasyOCR with custom correction logic.
- Achieved 80% increase in efficiency by implementing batch image processing and automating Excel report generation.

Projects

CSS Switcher

Bengaluru, India

12/2024 - 06/2025

Dynamic UI Component Styling & Export

- Enhanced user engagement by automating component hierarchy and implementing SVG/PNG export, improving system efficiency by 60%.

APSNG & ACPNG Automation

Bengaluru, India

03/2026 - 05/2026

Engineering Data Validation

- Achieved 90% process efficiency improvement by creating Python automation workflows for validating aircraft Part Numbers via REST APIs.

Education

Gogte Institute of Technology, Belgaum

Belgaum, India

Master of Computer Applications

06/2021 - 07/2023

Gogte College of Commerce

Belgaum, India

Bachelor of Computer Applications

06/2018 - 06/2021
